Editorial

Dear Colleagues!

You are holding in your hands the first edition of the journal *Archiv EuroEco*, which was released by the Editorial Board of European Scientific Society in Hanover. Among authors there are specialists representing various fields of ecology and 8 countries: Russia, Germany, Ukraine, Estonia, Latvia, Kazakhstan, Brasil and China.

Journal *Archiv EuroEco* highlights researches on all aspects of ecology, with particular emphasis on investigations that develop new concepts, new technologies and methods that test ecological theory, or that lead to an increased appreciation for the diversity of ecological phenomena. Theoretical, analytical, experimental, historical, and descriptive approaches are all appropriate, though preference is given to research and synthesis that leads to generalizations potentially applicable to other species, populations, communities or ecosystems. Included within the journal are papers on physiological responses of individual organisms to their environments, ecological genetics and evolution, the structure and dynamics of populations, interactions among individuals of the same or different species and ecosystems processes.

Modern ecology forms a fairly complex, interrelated and multidisciplinary science, whose successful development is based on regular communication and cooperation of specialists with different backgrounds. This goal is put forward by the international ecological Symposium EuroEco-Hannover, which is annually convened in Hanover and the journal *Archiv EuroEco*. We hope that our forum and the new journal *Archiv EuroEco* will make its best in bringing together specialists from different countries and therefore improving the quality of the environment.

Editorial Board

G. Tyminskiy	Germany
V. Mymrin	Brasil
M. Benke	Germany
A. Raukas	Estonia
K. Segoo	South Korea
O. Kotsar	Ukraine
I. Berg	Germany
I. Orzhelsky	Switzerland

Archiv Euro Eco Nr. 1 2011-10-28
